

**ReadMe: Stata Data Files and Programs for:**

**Becker/Hornung/Woessmann, “Education and Catch-up in the Industrial Revolution”, *American Economic Journal: Macroeconomics*.**

If you change your Stata directory to the path where you have saved the two datasets – bhw\_data\_main.dta and bhw\_data\_fixed.dta – then running the do-file bhw\_tables\_20100827.do will produce all results of the paper. Comparison with the paper text makes the datasets self-explanatory.
