

**README for**  
**Risk Aversion and Incentive Effects: Comment**

by

Glenn W. Harrison, Eric Johnson, Melayne M. McInnes & E. Elisabet Rutström<sup>†</sup>

The raw data and *Stata* code to replicate our results is archived in the ZIP file called “HJMR Comment -- Data and Code.ZIP”. Extract these files, and execute the “HJMR Comment.DO” file using *Stata*. The LOG file with the same prefix contains the output from executing the *Stata* commands. Contact Harrison if you have any questions.

The archive also contains the instructions and record sheets used in all experiments.

All data and files are also stored in the ExLab Digital Library at <http://exlab.bus.ucf.edu>.
