

"Campaign Contributions over CEOs' Careers" Data and Code READ_ME.TXT

Adam R. Fremeth
Brandon Schaufele
Brian Kelleher Richter

31 January 2013

This .ZIP file contains the data and code required to replicate the work in our paper "Campaign Contributions over CEOs' Careers" published in the American Economic Journal: Applied Economics"

The data is saved in STATA format as:
campaign_contribution_over_CEO_Careers.dta
The data labels are filled in this file so opening it in STATA,
it should be clear what each series is.

We also provide code that replicates our analysis in STATA as:
stata_code_for_contributions_over_ceo_careers.do

This .DO file is heavily commented. As noted in it, we cannot publicly provide the data required to replicate Table 4 as some of the data is proprietary and owned by EXECUCOMP. Nevertheless, we provide comments on how to reconstruct our variables used in it if you have access to that dataset.
