## Deterrence and Geographical Externalities in Auto Theft

By: Marco Gonzalez-Navarro

### *-Financial support:*

- Financial support for this paper was provided by the Fellowship of the Woodrow Wilson Scholars at Princeton University in the form of a scholarship for thesis writing.
- The Center for Economic Policy Studies at Princeton University helped finance the purchase of the vehicle sales data from AMIA.
- The paper was prepared for submission during a postdoctoral appointment at UC-Berkeley financed by the Robert Wood Johnson Foundation under the Scholars in Health Policy Research program.

### *-In-kind support:*

- The theft data were made available free of charge by AMIS. For this I thank Enrique Olmedo Salazar, then head of auto theft statistics at AMIS and his personal assistant Laura Espinoza.
- Interviews and rollout data on Lojack implementation in Mexico were obtained from Juan Moreno at Lojack Mexico.
- Susana Pineda at Ford Mexico provided data on costs and verified rollout information.

### *-Relevant relations*

- The author declares that he has no relevant material financial interests that relate to the research described in this paper.
- The author declares not to have any paid or unpaid positions as officer, director, or board member of any profit-making or non-profit entity.
- None of the author's close relatives have any relevant paid or unpaid positions as officer, director, or board member of any profit-making or non-profit entity whose policy positions, goals or financial interests relate to the article.

### *-Prior review*

- The author was free to write the paper without any party reviewing the paper prior to circulation.

### *-IRB approval*

- No IRB approval was requested because no human subjects were involved in the research.
