Parental Education and Offspring Outcomes: Evidence from the Swedish Compulsory School Reform

Dan-Olof Rooth

The paper “Parental Education and Offspring Outcomes: Evidence from the Swedish Compulsory School Reform” was written with financial support from the Swedish Council for Working Life and Social Research (grant 2011-1032 “Health in adolescence and later life earnings. A study on the labor market outcomes of the military enlistment cohorts 1969-1997”). Additional financial support was given by a research grant from the Centre for Economic Demography (CED) at Lund University.

The author declares that he has no other relevant or material financial interests that relate to the research described in this paper.
