

Disclosure Statement for the article

**On the Impact of Microcredit: Evidence from a Randomized Intervention in Rural Ethiopia**

The research described in the submitted manuscript has received financial support from the following sources:

Family Health International (now FHI360)

The David & Lucile Packard Foundation

I have not received any financial support in the form of consultant fees, retainers, grants and the like from any interested party, where an “interested” party is any individual, group, or organization that has a financial, ideological, or political stake related to the article.

I was employed by Family Health International during the course of the study, and was its Principal Investigator. The study was conducted with a grant provided by the Packard Foundation which funds the credit and family planning programs evaluated in the study. The Foundation, however, was not involved in the design of the study, collection of data, analysis, and interpretation of results. The research reported in this manuscript was conducted after the final report was submitted to the Foundation and has not been reviewed by the Foundation, or its grantees in Ethiopia

The above disclosures also apply to any close relative or partner of mine.

No other party had the right to review the paper prior to its circulation.
