“Capacity and Utilization in Health Care: The Effect of Empty Beds on Neonatal Intensive Care Admission”

Seth Freedman, Indiana University

This work was supported by AHRQ Dissertation Fellowship Grant 1R36HS018266-01. I also received financial support from the Robert Wood Johnson Foundation as a Scholar in Health Policy Research. The University of Maryland Department of Economics and faculty (including Bill Evans, Mark Duggan, and Judy Hellerstein) provided initial financial support for purchasing data.

Other than the support mentioned above, I have no relevant or material financial interests that relate to the research described in the paper.

This project has been approved by the Indiana University IRB. In previous years it was also approved by IRBs at the University of Maryland and the University of Michigan. The work was also approved by the California Office of Statewide Health Planning and Development’s Committee for the Protection of Human Subjects and the New York Department of Health’s Data Protection Review Board.

A handwritten signature in cursive script that reads "Seth Freedman".
