

Disclosure statement – Mirabelle Muûls

The interviews were funded through grants from the European Climate Foundation and the Economic and Social Research Council. The Centre for Economic Performance and the Grantham Institute on Climate Change at the London School of Economics let us use their facilities (mainly rooms and computers) during the interview process. The interview dataset is our own property. Orbis is a commercial dataset used through a license held by the London School of Economics library. The CITL data are publicly available.

Since 2009 I have received financial support for several separate projects also related to climate policy. Together with Ralf Martin and Ulrich Wagner, I was hired in 2012 by the UK Department for Energy and Climate Change to write a literature review of the EU ETS which is available at: https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/48449/5725-an-evidence-review-of-the-eu-emissions-trading-sys.pdf.

Furthermore, Martin, Wagner and I received a grant (2012-2014) from the ESRC (#ES/J006742/1) to conduct an ex-post evaluation of the EU ETS.

From 2011-2013, I have received a postdoctoral early career fellowship from the Leverhulme Trust to conduct research on the impact of climate and climate policies on firms. I am also part of two research consortia funded by the European Commission FP7 program. Within the Social Impact Policy Analysis of Technological Innovation Challenges (SIMPATIC) consortium I am studying the characteristics of “clean” innovation and the implications of climate change policies for growth. Within the ENTRACTE consortium I am conducting an econometric ex-post evaluation of the EU ETS.

None of these interested parties have requested to review the results of the study prior to their dissemination.
