

## Disclosure statement – Ralf Martin

The interviews were funded through grants from the European Climate Foundation and the Economic and Social Research Council. The Centre for Economic Performance and the Grantham Institute on Climate Change at the London School of Economics let us use their facilities (mainly rooms and computers) during the interview process. The interview dataset is our own property. Orbis is a commercial dataset used through a license held by the London School of Economics library. The CITL data are publicly available.

Since 2009 I have received financial support for several separate projects also related to climate policy. Together with Mirabelle Muuls and Ulrich Wagner, I was hired in 2012 by the UK Department for Energy and Climate Change to write a literature review of the EU ETS which is available at: [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/48449/5725-an-evidence-review-of-the-eu-emissions-trading-sys.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/48449/5725-an-evidence-review-of-the-eu-emissions-trading-sys.pdf).

Furthermore, Muuls, Wagner and I received a grant (2012-2014) from the ESRC (#ES/J006742/1) to conduct an ex-post evaluation of the EU ETS. The same institution supported a research project by Wagner and myself on the impact of the UK Climate Change Levy (#RES-000-22-2711). In 2008/09 the OECD hired Wagner and myself to write two reports on climate policy and firm behavior (documents COM/ENV/EPOC/CTPA/CFA(2008)34/FINAL and COM/ENV/EPOC/CTPA/CFA(2008)33/FINAL).

From 2008-2011 I have received a postdoctoral fellowship from the British Academy. In 2012 I won a Google research award to develop “clean” innovation indicators using Google search data. I am also part of two research consortia funded by the European Commission FP7 program. Within the Social Impact Policy Analysis of Technological Innovation Challenges (SIMPATIC) consortium I am studying the characteristics of “clean” innovation and the implications of climate change policies for growth. Within the ENTRACTE consortium I am conducting and econometric ex post evaluation of the EU ETS.

None of these interested parties have requested to review the results of the study prior to their dissemination.

A handwritten signature in black ink, appearing to read 'Ralf Martin', with a long horizontal stroke extending to the right.
