

Disclosure statement of Hilary Hoynes  
July 20, 2015

Hoynes received funding for this work from the U.S. Department of Agriculture under USDA FANRP Project 235, "Impact of Food Stamps and WIC on Health and Long Run Economic Outcomes." She also received funding from the University of Michigan PSID Small Grant Program, the UC Davis Center for Poverty Research, and UC Davis Committee on Research New Research Initiative.

Aside from the supported research funds, the author declares that she has no relevant or material financial interests that relate to the research described in this paper.

IRB exempt review was obtained through UC Berkeley.

Disclosure statement of Diane Whitmore Schanzenbach  
July 20, 2015

Schanzenbach received funding for this work from the U.S. Department of Agriculture under USDA FANRP Project 235, "Impact of Food Stamps and WIC on Health and Long Run Economic Outcomes." I was an unpaid member of the Institute of Medicine's Committee on the Examination of the Adequacy of Food Resources and SNAP Allotments while the current research was being conducted.

Aside from the supported research funding, the author declares that she has no relevant or material financial interests that relate to the research described in this paper.

Disclosure statement of Douglas Almond  
July 20, 2015

In June 2004, Almond received a USDA Food Assistance Research Grant, awarded by Joint Center for Poverty Research (Northwestern University and University of Chicago) for "Health Effects of the 1960s Food Stamps Program" (\$24,000). Almond has also received financial support from the NSF CAREER award "Health Determinants and Research Design" (SES-0847329).

Aside from these research funds, the author declares that he has no relevant or material financial interests that relate to the research described in this paper.
