

Disclosure Statement for Delavane Diaz

For the paper: Diaz and Keller, A potential disintegration of the West Antarctic Ice Sheet: Implications for economic analyses of climate policy (2016 AER papers and proceedings)

This research was supported by the National Science Foundation through the U.S. Department of Energy (DOE), Office of Science, Biological and Environmental Research Program, Integrated Assessment Program under Grant No. DE-SC0005171, the Network for Sustainable Climate Risk Management (SCRiM) under NSF cooperative agreement GEO-1240507, and the Penn State Center for Climate Risk Management. Any opinions, findings, and conclusions or recommendations expressed in this material are those of the authors and do not necessarily reflect the views of the funding agencies.

Delavane Diaz's research has been supported in the past three years by the Electric Power Research Institute (EPRI), DOE, and the Stanford Graduate Fellowship. She is currently a Senior Technical Leader at EPRI, an independent, 501(c)(3) non-profit organization that conducts research and development in the electricity sector for the benefit of the public. Through June, 2015 she was a PhD student in the Management Science and Engineering department at Stanford University.

No other party than the authors had the right to review the paper prior to its circulation.
