### Section C. Offered Savings Accounts

In order to thank you for participating in our survey, we would like to offer you the opportunity to open a *Mwananchi* account with Family Bank – these are the accounts that we talked about earlier today. Opening this account is completely free, and you can fill out an application right here. There are two kinds of accounts we are offering. The first is an individual account. This account can only be accessed by you, and no one else. We are also offering a joint account. This account can be accessed by both you and your spouse, but no one else. You can use either type of account as little or as much as you like. [OTHER TERMS HERE].

Does anyone have any questions about these savings accounts?

If you sign up for an account today, you will also receive the promotional interest rates that you drew earlier today on your accounts. Remember what your interest rates were.

Remember how an interest rate works. Suppose that you receive a promotional interest rate of 10%. This means that if you deposit Ksh 100 in the account as soon as you open it and leave it there, in six months we will deposit Ksh 10 into your account, so your savings will have grown to a total of Ksh 110 without any effort on your part. The more you save, the more you earn – if you deposited Ksh 1000, we would deposit Ksh 100 in your account in six months. If you deposited Ksh 10,000, we would deposit Ksh 1,000 in six months.

Does anyone have any questions about this promotional interest rate?

The next few questions ask you about whether you would like to open different individual and joint *Mwananchi* accounts. Please answer them carefully and tell us what you truly prefer – your responses are essential for our study.

Please be assured that we will not share your answers to these questions with anyone, including your spouse. This way your spouse will never be able to tell what you chose, and you will not be able to tell what your spouse chose.

#### **Section D. Choosing Sums of Money**

We are almost done with our survey. Finally, we would like to ask you some questions about how you view receiving different amounts of money at different times. If you answer these questions, you will have a 1 in 5 chance of getting one of your choices. We will pick those people randomly at the end of the session, by drawing individual IDs out of this box. This way everyone has an equal chance at receiving a choice.

If you are selected to get one of your choices, you will randomly pick which choice by drawing the number out of this other box.

None of the choices involve receiving money today. If you are selected, you could receive money anywhere from tomorrow to three months/12 weeks from now – it depends on which choice you draw.

Since the money will be given to you in the future, you will have two options: if you open an account with Family Bank, we can deposit your winnings directly into your new bank account. This way you will have to do nothing to receive your winnings.

Or, if you wish, we can give you a certificate that you can use to pick up your payment at IPA. You will not be able to pick up your payment until the date on your certificate. You will also have to present your national ID card when picking up your payment so we know that the money is going to you.

These choices are not designed to test you - there is no right answer, other than the choice that you truly prefer. That is why you have a chance of actually winning one of your choices. So please take the time to think carefully about each sum of money in each question. It is very important for us to understand which sums you find more attractive.

Finally, please note that if you are chosen to win a sum of money, and your answer to the choice we randomly pick is “I do not wish to answer”, or a blank answer, then we will not be able to award you a sum of money.

[FO: If respondent given inconsistent choices (i.e. prefers 150 tomorrow to 300 in 2 weeks, but prefers 300 in 2 weeks to 220 tomorrow, prompt them and allow them to change their answers if need be]
