

This file explains how to replicate the results in Bandiera et al (2019) "Women's Empowerment in Action: Evidence from a Randomized Control Trial in Africa"

Step 1: install the ado files provided

Step 2: run file 0.master.do

Note: the master do file calls all the do files required to produce all the figures and tables. These can also be produced separately by running the 1.Creation.do file and the do file named after individual tables and figures.
