DISCLOSURE STATEMENT

Editors

Journal of Economic Perspectives

Dear Editors:

This is a disclosure statement for the paper, "Transmission Impossible? Prospects for Decarbonizing the U.S. Grid," joint with Lucas Davis and Catherine Hausman.

I have reviewed the AEA disclosure guidelines and believe I have nothing to report. I have not received any financial compensation to conduct research on this topic nor do I have any financial relationships with organizations that have an interest in this research. My time while working on this project was supported by a combination of my MIT academic salary and a fellowship from the Radcliffe Institute for Advanced Study for 2021-22.

Sincerely,

A handwritten signature in black ink that reads 'Nancy L. Rose'.

Nancy L. Rose

*Charles P. Kindleberger Professor of Applied Economics, MIT Economics Department*
