

Sources of financial support for this research: This research received no specific financial support. This paper used only data that is publicly available free of charge (from the Human Fertility Database, the UN World Population Prospects, and the Demographic and Health Surveys).

Other financial support and relevant relationships:

In the past, Dean Spears, while on leave without pay from UT-Austin, has been paid a salary as Executive Director of r.i.c.e., a doing business as name of RICE Institute, Inc, a 501(c) public charity non-profit corporation online at www.riceinstitute.org.

Separately from r.i.c.e., Dean Spears has personally been paid as a Short Term Consultant at the World Bank, as a consultant for IPFRI, and as a short-term Visiting Fellow and Lecturer at Princeton University's Woodrow Wilson School. He has had travel funded by the Gates Foundation, the World Bank, the Royal Economic Society, and by many universities for a conference or presentation. He was paid an honorarium by McMaster University as the 2017 Labelle Lecturer in Health Economics and by Penn State University for his 2024 DeJong Lecture in demography. His AIIS book prize paid a subvention to Harper Collins for his book *Where India Goes* with Diane Coffey, for which Spears and Coffey waived royalties. His Austin Robinson Memorial Prize resulted in a prize payment to r.i.c.e. He received author royalties from Simon and Schuster for his book *After the Spike*.

Dean Spears has received research funding from the NIH, GiveWell, the Smith Richardson Foundation, the Musk Foundation, the Bill and Melinda Gates Foundation, Founders Pledge, USAID, the IGC, Longview Philanthropy, and UT-Austin, as well as from the individual donors to r.i.c.e.

Partner:

Dean Spears is married to Diane Coffey, who has also received research funding from GiveWell, the NIH and the Gates Foundation, is an associate professor at UT Austin, and is on the board of r.i.c.e.
