WORKING PAPERS

The Impact of Fatal Encounters on Institutional Trust

This paper examines the effect of fatal police violence on institutional trust. In Chicago, I find that 911 calls fall and complaints against officers increase after incidents of fatal police violence. Nationally, self-reported trust in the justice system falls after incidents of fatal police violence.

Monitoring Corruption: Can Top-down Monitoring Crowd-Out Grass-roots Participation? (with Robert Gonzalez and Foteini Tzachrista) *Under Review*

Building on Olken's (2009) road-building field experiment in Indonesia; we find a large and robust effect of the participation interventions on missing expenditures in villages without an audit in place. However, this effect vanishes as soon as an audit is simultaneously implemented in the village.

DESCRIPTIVE/ POLICY	<p>Fatal Encounters Between Native Americans and the Police, CICD Publications (Minneapolis Federal Reserve)</p> <p><i>This article documents the number of fatal encounters per population for Native Americans across the country and in the Ninth Federal Reserve District. In the Ninth District, Native American males have 14 times as many fatal encounters as white males; Native American females have 38 times as many fatal encounters as white females.</i></p>
