Manuscript Title:

Multilateral Trade Bargaining: A First Look at the GATT Bargaining Records

Disclosure Statement:

I received funding from NSF (Grant SES-1326940) for this work. During the time this paper was being researched and written, I engaged in economic consulting on unrelated matters for Verizon and Comcast. Those firms may have interests in tariff policy but as far as I know they were unaware of my research in this area, and the matters for which I was a paid consultant had to do with specific antitrust issues unrelated to any issues regarding international trade or tariffs.
