

### **Project: NVRB - Salaried Workers in Ghana**

Buehren, N., Ceretti, V., Dervisevic, E., Goldstein, M., Klapper, L., Koroknay-Palicz, T., & Schaner, S. (2018). Salary Delays and Overdrafts in Rural Ghana. *AEA Papers and Proceedings*, 108: 449-52.

Files provided along with the main document are the following:

- 1) Main dataset containing information used to create the tables used in the paper. This dataset is saved in Stata, under the title: "Salary Delays and Overdrafts\_Dataset.dta".
- 2) Stata do-file which can be run in order to conduct regressions and obtain tables used in the paper. This do-file is named: "Salary Delays and Overdrafts\_Do file.do"
- 3) "Table 1.csv" is a full table whose version is given in the paper as Table 1, and this table is obtained by running the above do-file.
- 4) "Table 2.csv" is a full table whose version is given in the paper as Table 2, and this table is obtained by running the above do-file.

User should save all files in the same folder and, in the do-file given above, provide the full path of that folder in line 7 of the do-file (in place of `cd "~~~~"`). In order to obtain the tables in the main paper, the user should run the full do-file.
