

Financial support for the research mentioned in this paper was provided by the Sloan School of Management at MIT.

Roberto Rigobon is a co-founder and has an ownership stake in PriceStats LLC, a private company that uses scraped online data to compute inflation indices. PriceStats provided several of the indices shown in this paper and most of the micro data used for the research at the Billion Prices Project described in the paper.

Roberto Rigobon is also an ad-honorem member of the Census Scientific Advisory Committee of the US Census Bureau, where he provides advise on various issues, including the use of online data in the construction economic statistics. Additionally, he is a member of CNStat, a permanent standing committee at the National Academy of Sciences that oversees the mayor statistical offices of the US.
