

## WHAT - NO COST BENEFIT ANALYSIS

Posted by WILLIAM H COLBERT

Legislators are noted for their allergy to cost-benefit analysis. President Reagan tried to impose this on the federal government with an executive order, but the order foundered on the tacit agreement between legislators and bureaucrats to cater to special interests. The large print sales pitch for our constitution that was embodied in the Preamble should be more binding than the small print verbiage in the constitution itself, in my opinion.
