

ADVANCES IN RESEARCH TRANSPARENCY

The AEA RCT Registry for randomized controlled trials...

Now containing 3,800+ studies from over 150 countries!

- ✓ Central source for ongoing and completed randomized controlled trials (RCTs)
- ✓ Dedicated to economics and the social sciences— and **free** to registrants and researchers
- ✓ Sheds light on the volume of published or unpublished research outcomes
- ✓ Comprehensive study details include abstracts, start and end dates, research design, outcomes, contact names, and **more**

New! Dataverse downloads available at

Flexible interface allows registrants to track versions, control confidentiality, and add details at any point in the life cycle of the study.

Browse thousands of RCTs, determine pre-registered and post-registered trials, save results, or download trial data for offline review.

The AEA RCT Registry was developed by J-PAL, working with AEA affiliated faculty Esther Duflo and Larry Katz. J-PAL manages the Registry with continued guidance from the AEA.

Register early to increase the credibility of your results!
